YTD Sales by Shipping type

STEPS IN PROJECT

1. Problem Statement
2. Import Data in SQL Server Management Studio
3. Connecting Power BI to SQL Management Studio
4. Data Cleaning
5. Data Proccessing
6. Data Modelling
7. Create Data Table
8. Data Visualization
9. Creating Dashboard
10. Generating Insights

PROBLEM STATEMENT

A US Based Ecommerce Sales Company wants us to create a Sales Dashboard showing information of YTD Sales and generate insights for below scenarios:

- Create a KPI Banner showing YTD Sales, YTD Profit, YTD Quantity Sold, YTD Profit Margin.
- Find Year-on-Year (YoY) growth for each KPI and show a YTD sparkline for each measure in the KPI to understand the monthly trend for each fact.
- Find YTD Sales, PYTD Sales, and YoY Sales Growth for different customer categories. Add a trend icon for each category.
- Find YTD Sales performance by each State.
- Top 5 and Bottom 5 Products by Sales.
- YTD Sales by Region to know the best and worst performing region across the country.
- YTD Sales by Shipping Type to identify the best shipping type percentage.

POWER BI FUNCTIONALITIES

- How to connect Power BI to MS SQL Server and Flat Files
- Data Modelling with three tables
- Data Cleaning in Power Query
- How to create a Date Table in Power BI
- Time Intelligence functions (TOTALYTD, SAMEPERIODLASTYEAR, etc.)
- Creating Dynamic and Complex KPIs
- Basic to Advanced DAX Queries
- Conditional Formatting and adding dynamic icons in Power BI
- Different DAX functions like CALCULATE, SUM, SUMX, FILTER, VALUES, SELECTEDVALUE, RETURN, CONCATENATE, DIVIDE, VAR, etc.

POWER BI FUNCTIONALITIES

- Creating different charts, maps, and formatting them
- Generating insights from charts
- Export report
